

Emerging Issues and Opportunities for Improving the Nutrition and Health Outcomes of Food Systems

PANEL FOR THE AIARD ANNUAL CONFERENCE AND 2018 FUTURE LEADERS
FORUM

JUNE 3-5, 2018

HILTON GARDEN INN, WASHINGTON, DC

Most global burden of disease risk factors are linked to diet

Source: Global Burden of Disease Study 2013 Collaborators (2015), Figure 5

Note: The graph shows global disability-adjusted life years (DALYs) attributed to level 2 risk factors in 2013 for both sexes combined.

As food systems evolve to address the challenges of population growth, environmental change and economic instability, we should ensure that they also **improve nutrition.**

Emerging Issues and Opportunities

- ▶ Research partnerships to transform the food system, especially involving the private sector – *Sally Rockey and FFAR*
- ▶ Community-based approaches to improve nutrition at the household level – *Rolf Klemm and Helen Keller International*
- ▶ Harnessing the power of private investment for better nutrition – *Joe Shields, Flow Equity in Ethiopia*
